

General Product Safety Regulation

BBB Cycling

Version: December 2024

As you may have heard, new legislation regarding product safety will come into effect on December 13, 2024. The General Product Safety Regulation (GPSR) is a new European law that aims to ensure that consumer products in Europe are safe. The GPSR, Regulation (EU) 2023/988, will replace existing product safety regulations.

At BBB Cycling, we take product safety very seriously and are committed to comply with all EU product safety regulations. As a manufacturer, we develop, produce, and test our products to meet the highest safety and quality requirements set by European law. We have done so in the past with the previous product safety regulations and will do so from now on according to the new GPRS regulations.

If you encounter any issues or have doubts that a product is not meeting these expectations, please contact us and we will provide you with the necessary information and/or documentation about our products.

In the unlikely event that we discover an unsafe product reaches the market, we will follow the GPSR guidelines and promptly contact you with instructions.

When contacting us with a product question or notification of a product issue, please provide the product name, article number and batch number/production date together with as many details as possible.

Thank you for your continued trust in BBB Cycling.

We make the move together!

Team BBB Cycling
