Commitment to Compliance with the General Product Safety Regulation (GPSR)

We, Leatt Corporation, affirm our unwavering commitment to the safety and quality of our products in compliance with the General Product Safety Regulation (EU) 2019/1020 and other relevant European Union regulations.

As part of our dedication to ensuring the highest standards of safety, we confirm that all products manufactured, imported, or distributed by our company are subject to rigorous quality control measures. We comply fully with all requirements set forth by the GPSR to ensure that our products are safe for consumers under normal or foreseeable conditions of use.

We take the following steps to ensure ongoing compliance with the GPSR:

- Product Testing and Risk Assessment:** All our products undergo thorough testing, and risk assessments are carried out to identify and mitigate potential hazards. We adhere to the safety requirements outlined in relevant EU legislation, including specific standards for product categories.
- Supplier and Manufacturer Monitoring:** We work closely with our suppliers and manufacturers to ensure that their products also meet all applicable safety regulations, and we require them to provide relevant documentation such as certificates of conformity.
- Clear Labeling and Instructions:** We ensure that all products are properly labeled with necessary safety information, warnings, and usage instructions, in accordance with EU standards. This ensures that consumers have all the information they need to use our products safely.
- Recall Procedures:** In the unlikely event that any product presents a safety risk, we have a clear and effective recall procedure in place to protect consumers.
- Ongoing Monitoring and Reporting:** We continuously monitor our product lines and work in close collaboration with regulatory bodies to stay up-to-date with any changes in EU product safety legislation.

We believe that consumer safety is paramount, and we are fully committed to ensuring that all our products meet the stringent requirements set by the EU's General Product Safety Regulation.
